Feeding Directions

Add SOW BOOST GRAN at the rate of 50 pounds per ton to boost a swine grower/finisher diet up to the requirements of your breeding herd. Must be used together with an appropriate grow-finish premix.

SOW BOOST GRAN included in swine rations at 50 pounds per ton of complete feed will provide 200 ppb chromium from Chromium Tripicolinate.

Consult your PEET'S Representative for ration balancing services to provide optimum grain usage when profiling the nutritional needs of your herd.

Caution

CAUTION: Due to the copper level, do not feed to sheep. Follow label directions.

The feeding of supplemental selenium should not exceed 0.3 ppm of total diet. The addition to feed of higher levels of this premix containing selenium is not permitted.
