Feeding Directions

Feed FDLT 40/14 BT500 M.4 PEL Medicated continuously at the rate of 1 pound per head per day to heifers being fed in confinement for slaughter to provide 250 mg of Lasalocid and .4 mg Melengestrol Acetate daily.

Consult your PEET'S Representative for ration balancing services and medicated options available.

NOTICE: Expiration date of 90 days after manufacture.

Caution

Not effective in steers and spayed heifers. The safety of lasalocid in unapproved species has not been established. Do not allow horses or other equines access to supplements containing lasalocid as ingestion may be fatal. Mix thoroughly with grain and(or) roughage prior to feeding. Feeding undiluted, mixing errors and inadequate mixing of the total ration may result in excess lasalocid concentration which could be fatal to cattle. A withdrawal period has not been established for lasalocid in pre-ruminating cattle. Do not use in calves to be processed for veal. The feeding of supplemental selenium should not exceed 0.3 ppm of total diet. The addition to feed of higher levels of this premix containing selenium is not permitted.
