Feeding Directions

Feed FEEDLOT CP SUPPLEMENT BT750 M.5 MEDICATED at the rate of 8/10 of a pound per head per day to heifers fed in confinement for slaughter to provide 300 mg of Lasalocid and .4 mg of Melengestrol Acetate per head per day.

Caution

Additive Cautions and Warnings: Not effective in steers and spayed heifers. The safety of lasalocid in unapproved species has not been established. Do not allow horses or other equines access to supplements containing lasalocid as ingestion may be fatal. Mix thoroughly with grain and(or) roughage prior to feeding. Feeding undiluted, mixing errors and inadequate mixing of the total ration may result in excess lasalocid concentration which could be fatal to cattle. A withdrawal period has not been established for lasalocid in pre-ruminating cattle. Do not use in calves to be processed for veal. The feeding of supplemental selenium should not exceed 0.3 ppm of total diet. The addition to feed of higher levels of this premix containing selenium is not permitted.

EXPIRATION DATE MARKED ON TAG: (Must be used within 90 days of manufacture)
